

# AS3551 Consultation Workshop

College of Biomedical Engineering

Over the last twelve (12) months, the Australian Standard AS3551 – Technical Management Programs for Medical Devices has undergone a significant re-write. The Standard is now available in **DRAFT** format for public comment: [www.standards.org.au](http://www.standards.org.au)

The College of Biomedical Engineers invites you to be part of the comment stage: to give your input into the new standard, participate in a discussion relating to the content and to talk directly with the principle authors from the responsible Standards Australia Committee (HE-003) – Mr Stuart Clifton & Mr Michael Flood.

The interactive workshops will include a short presentation outlining the proposed changes and then an open discussion with all present. There is no cost to attend these workshops.
