

0.000643 main	(2): ALWAYS INCLUDE THE FOLLOWING LINES WHEN SENDING DEBUG MESSAGES TO THE MAILING LIST:
0.000755 main	(2): gphoto2 2.5.26.1
0.000807 main	(2): gphoto2 has been compiled with the following options:
0.000894 main	(2): + gcc (C compiler used)
0.000928 main	(2): + popt (mandatory, for handling command-line parameters)
0.000967 main	(2): + exif (for displaying EXIF information)
0.001006 main	(2): + no cdk (for accessing configuration options)
0.001040 main	(2): + no aa (for displaying live previews)
0.001075 main	(2): + jpeg (for displaying live previews in JPEG format)
0.001112 main	(2): + no readline (for easy navigation in the shell)
0.001152 main	(2): libgphoto2 2.5.22
0.001194 main	(2): libgphoto2 has been compiled with the following options:
0.001234 main	(2): + all camlibs
0.001267 main	(2): + gcc (C compiler used)
0.001304 main	(2): + ltdl (for portable loading of camlibs)
0.001341 main	(2): + EXIF (for special handling of EXIF files)
0.001379 main	(2): libgphoto2_port 0.12.0
0.001422 main	(2): libgphoto2_port has been compiled with the following options:
0.001461 main	(2): + iolibs: disk ptpip serial usb1 usbdiskdirect usbscsi
0.001496 main	(2): + gcc (C compiler used)
0.001529 main	(2): + ltdl (for portable loading of iolibs)
0.001566 main	(2): + USB (libusb1, for USB cameras)
0.001600 main	(2): + serial (for serial cameras)
0.001636 main	(2): + no resmgr (serial port access and locking)
0.001670 main	(2): + no ttylock (serial port locking)
0.001708 main	(2): + no lockdev (serial port locking)
0.001743 main	(2): CAMLIBS env var not set, using compile-time default instead
0.001780 main	(2): IOLIBS env var not set, using compile-time default instead
0.001815 main	(2): invoked with following arguments:
0.001850 main	(2): --debug
0.001949 load_settings	(2): Creating gphoto config directory ('/home/pi/.gphoto')

0.002168 load_settings (2): Loading settings from file '/home/pi/.gphoto/
settings'.
