

WILLING TO PARTICIPATE IN A HUMANITARIAN PROJECT?

Médecins Sans Frontières – Geneva is recruiting

a Software Developer

UniField is an international cross-section IS project covering the finance and supply business areas for MSF fields developed on OpenERP technology.

Under the responsibility of the Development Project Manager, the developer(s)/software engineer(s) will be participating in the whole development process of UniField, but essentially by customising the product retained.

Main responsibilities

- Participate in every phase of the lifecycle software development, ranging from writing spec, designing and developing the selected approach, writing test cases, to the maintenance of the final product. Work closely with internal and external teams.
- Ensure the quality of the deliverables with respect of the required business functionalities
- According to the selected candidate profile, additional responsibilities in specific areas may be given (software architecture, project management, deployment & infrastructure, etc...)

Candidate Profile

- MS/BS in Computer Science or related field
- 2+ years of hands-on software development experiences in at least one of the following OO Programming languages: Python, Ruby, Java, C++. Python is a strong plus
- Very strong skills with MVC frameworks in some concrete projects
- Extensive experiences with Eclipse environment
- Extensive knowledge of GNU/Linux (or UNIX) environments and strong interest in open-source community
- Strong database knowledge (experiences with Postgresql is a plus)
- Knowledge of Agile/iterative methods
- Strong analytical, synthesis and problem solving skills
- Creativity, customer and result-oriented
- Rigor, strong time management and organizational skills, ability to work under pressure
- English oral and written are mandatory, French is an advantage

Conditions

- In project mode (18 months)
- Beginning of the contract: ASAP
- Position based in Geneva (with some travel within Europe)
- Salary: 82'200 CHF

Technology

- Fully open-source technologies have been retained (OS, DBMS, framework, application, development environment, etc...)

Application files (CV and cover letter) to be sent before November 5th 2010 and **by email only** to: msfch-recruitment@geneva.msf.org. The subject should contain the following reference: UNIFIELD-DEV. Only the selected applications will be answered.
