1. Removing obsolete files ....
... Done removing obsolete files.

2. Testing to see if old LyX user's folder should be moved to new location ....
• Old LyX user's folder exists at ~/Library/'Application Support'/LyX/. This was left untouched because a newer LyX user's folder already exists at the new location, ~/Library/'Application Support'/LyX-1.4/.
... Done moving LyX user's directory to new location.

3. Tidying up your preferences file to reflect new location of LyX user's directory ....
... Done.

4. Installing default LyX templates ....
... Done installing default LyX templates.

5. Installing LaTeX files ....
• Found TeX installation at /usr/local/teTeX/bin/powerpc-apple-darwin-current.
• Found TeX local directory at /usr/local/teTeX/share/texmf.local.
• Will not overwrite preview installation.
• Will not overwrite srcltx installation.
• Installed LyX's additional LaTeX .cls and .sty files.
• TeX installation updated.
... Done.
