

Are you ready for the next Generation of Integration?

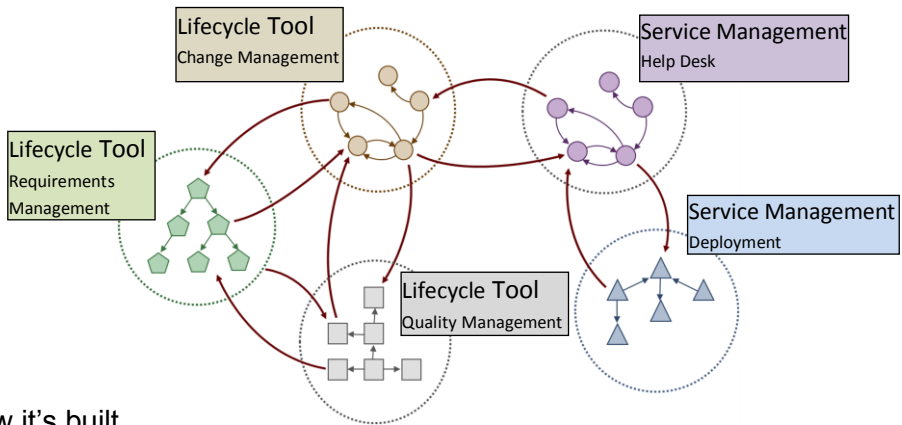

Tool Integration and Interoperability based on open and standard Internet Technologies

Key features support:

- Share data and information
- Traceability of all artefacts
- Visibility into all aspects of the implementation process
- Control through policies and processes

Linked Lifecycle Data...

Collaboration of the next Generation

How it's built...

Different ALM, PLM Specifications based on a core specification

The OSLC Core specifies the primary integration techniques for integrating lifecycle tools, such as communication protocols and basic data representation

The OSLC domain workgroups specify additional vocabulary specific to their lifecycle domain, but do not add new protocols

Learn more and see how you or your company can benefit from using OSLC

Participate and contribute to the OSLC regardless of whether you are a Lifecycle Domain Expert, Software or Systems Engineer or you want to become one
