

Filename: port1-to-port-7-Common=50Ohm-others=open.s2p  
Minicircuits ZFSC-16-3 1-30 MHz splitter. VNA covers 50 MHz to 20 MHz  
Output port 1 to output port 7. Common terminated in 50 Ohms. Others open  
The isolation is not too bad, although I am measuring outside its range  
The other 14 ports are all open

Measured on 6 Jan 2015 at 15:45:10 GMT using an HP 8720D VNA with the following settings:  
Averaging=OFF, averaging\_factor=16. Smoothing=OFF, smoothing aperture = 1.000000 %  
Start frequency = 0.050000000 GHz, stop frequency =0.100000000 GHz. IF bandwidth = 30 Hz  
Power = 5.000000 dBm. Calibrated with an 85054B calibration kit.
