

Hello,

In all I set up a gateway sms with kannel under debian sarge.i am downloaded packages and configured files.

I use my mobile phone Motorola L6 as modem .My files of configuration walk well when I launch bearerbox /etc/kannel/kannel.conf not me dismissal no error message. The smsc is activated .I will like to know if it an option has to activate on the phone in order to stored the sms received in the files of kannel kannel (/var/log/kannel/kannel.store)

Here is a part of my kannel.conf file

SMSC CONNECTIONS

```
group = smsc
smc = at
#utilisation d'un téléphone motorola comme modem
modemtype = AT-HW
device = /dev/ttyACM0
speed = 9600
sms-center = "+22507481147"
validityperiod = 167
host = localhost
port = 13015
# pin = 1234
```

SMSBOX SETUP

```
group = smsbox
bearerbox-host = localhost
sendsms-port = 13013
log-file = "/var/log/kannel/smsbox.log"
log-level = 0
access-log = "/var/log/kannel/access.log"
sendsms-url = /cgi-bin/sendsms
```

Thank you in advance
