

Halfback Nymph

Nymph

Unknown

Materials

Hook Mustad 9672 size 8 - 12, weighted if desired.

Thread Black.

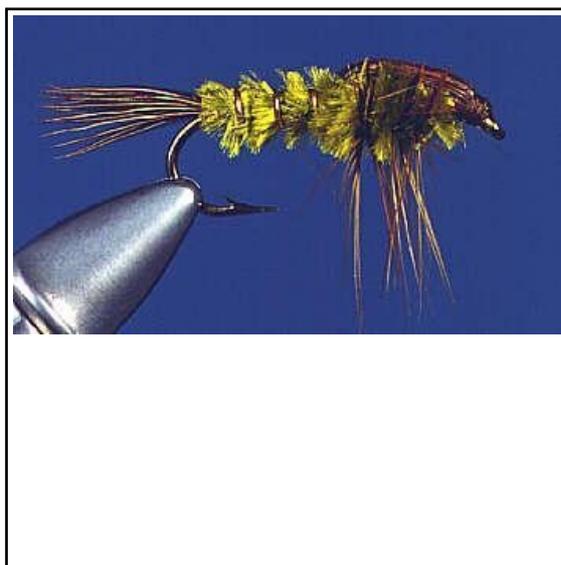

Tail Pheasant tail fibres.

Rib Copper wire

Abdomen Green chenille

Wingcase Pheasant tail fibres

Hackle Brown hen, clipped on top.

Tied by Unknown

Tying Information

Other Information

Halfback nymphs imitate immature dragonflies and damselflies, important food items in many of the area lakes. These flies can be fished near emergent vegetation. The flies should be allowed to sink, using either a floating line and a heavily weighted nymph, or an intermediate or slow sinking line, and retrieved with a slow hand-twist retrieve.
